# GarageVac

## Garage Organization Meets the 21st Century

Designed specifically for your garage, GarageVac will exceed your expectations in suction power, ease of installation and versatility. Great for hobby shops and utility rooms too.

## A Breakthrough in Garage Vacuum Design

Add power to convenience, throw in smart design throughout, and add simple, easy installation — meet the new GarageVac, a great addition to any garage. And did we say flexible? There's virtually no vacuuming task GarageVac can't handle with ease.

### Installs in 10 minutes or less

Choose either Flush Mount (2x4 stud wall) or Surface Mount models, whichever best suits your needs. Either way, installation's a snap.

### Space saving design

The compact GarageVac needs only 2½ square feet of wall space. That's 2/3 less than other systems and GarageVac keeps all your accessories organized in one place.

**Versatile tools** make any vacuuming job a snap

**Industry-leading** six-year warranty

**Five layer microfiber** filtration dust bag

### Handy tools for virtually any job

There's no nook or cranny you can't reach with the floor tool, telescoping wand, elongated dust brush, crevice tool and upholstery tool. And the unique 40-foot stretch hose shrinks to 8' for easy storage—just wrap it around the power unit and it's safely out of the way.

### Environmentally friendly, too

Garage Vac features HEPA type filtration—that means no dust or allergens are exhausted back into garage. And the easy-to-replace bag that holds about a gallon of debris, means you'll go a long time between changes.

**40-foot hose** shrinks to 8', and stores easily around the power unit

**One-gallon** dust bag

**Powerful 12 amp motor** with 398 air watts provides great suction power for all your cleanup jobs

### And check out these features that make GarageVac so unique

- It's completely portable, making it a snap to take it with you on your boat or RV.
- GarageVac works with any garage organization system on the market—however you organize your garage, GarageVac will fit right in.
- At just 9 pounds (and only 4 inches deep), GarageVac is easy enough for anyone in the family to use.
