**Simplicity®  
Deluxe Bias & Piping  
Machine**

Create customized bias tape and piping at the push of a button! Speed control dial allows adjustment for various fabrics.

The Simplicity Deluxe Bias and Piping Machine takes the original Bias Tape Maker to a new level with added features.

It now has speed control and Teflon® coated, non-stick iron surface. In addition to making custom bias tape, this Deluxe machine covers piping cord as well.

- Cover cording with your own fabric - great for matching piping for pillows and other home decorating projects.
- Cording, fabric and our proprietary fusible web are threaded into the machine, pass through a guide, then under a heating element to melt the web, securing the cording inside the fabric.
- Cord sizes ranging from 4/32" to 16/32" (3.17 mm to 12.70 mm) can be used with the Simplicity Deluxe Bias and Piping Machine.
- The Simplicity Deluxe Bias and Piping Machine accommodates fabrics ranging from light weight cottons to heavier home decorating fabric.
- Each size cording uses its own guide (no adjustments).
- Accessories and extension table sold separately
